69071 Fits Brickell Tandem Only

*Bikes Sold Separately

The Quadribent is a bike, recumbent or tandem vehicle consisting of parallel paired bicycles that are joined together side-by-side to form a quad bicycle that two or four people can ride together. The Quadribent attaches either two Sun EZ-1 recumbent bikes, Sun Streamway bikes or Sun Brickell tandem bikes to make a four wheel, side-by-side "Sociable Tandem" with independent gearing and pedaling. The bikes can be detached for solo use.
